SUMMARY

Business Analyst | Product Owner with 3+ years of experience across FinTech, Healthcare AI, Industrial Operations, SaaS, and Public Safety domains. Own end-to-end delivery, from discovery and requirement elicitation through backlog management, sprint execution, and UAT sign-off, while managing multiple concurrent product initiatives with international clients. Skilled at translating ambiguous business goals into delivery-ready requirements, backlogs, and specifications for cross-functional Agile teams, using AI-assisted tools to accelerate documentation, validation, and productivity.

CORE SKILLS

Business Analysis	Requirement Elicitation · BRD / FSD / SRS · User Stories & Acceptance Criteria · UAT Planning & Execution · Process Mapping
Product & Delivery	Product Ownership · Backlog Management · Scrum Facilitation · UML Diagrams · Wireframing · Risk Assessment
Data & Reporting	SQL (Joins, CTEs, Window Functions) · Power BI · Advanced Excel · KPI Design & Reporting
Tools & Platforms	JIRA · Confluence · Figma · MS Office Suite

PROFESSIONAL EXPERIENCE

Tech Exactly · Business Analyst

March 2026 – Present

- Own end-to-end delivery across multiple concurrent product projects, from requirement elicitation through client UAT sign-off.
- Translate ambiguous client briefs into structured BRDs, FSDs, SRS documents, UML diagrams, wireframes, and product roadmaps, maintaining zero misalignment between client expectations and development output across all active projects.
- Act as Product Owner: manage and prioritise product backlogs, facilitate sprint ceremonies, write and prioritise user stories, and keep every sprint aligned to agreed client goals across Agile/Scrum environments.
- Engage directly with international clients and end users for discovery and feedback, translating inputs into development-ready requirements and closing interpretation gaps at both ends of the delivery chain.

Sai Paramount IT Solutions · Business Analyst

July 2024 – March 2026

- Led BA delivery on a BBPS-integrated bill payment platform, defining end-to-end transaction flows for 10+ payment categories and ensuring full RBI and BBPS regulatory compliance throughout the build.
- Defined requirements for a first-of-its-kind real-time rent payment feature via credit card using IMPS, removing delays inherent to traditional payment methods and expanding the platform's addressable user base.
- Drove process improvements in requirement documentation and delivery coordination, shortening UAT cycles and reducing rework and production defects, delivering approximately 30% improvement in operational efficiency.

GEEMSCO Consultancy Services Pvt. Ltd. · Business Analyst

March 2023 – July 2024

- Supported requirement gathering, functional documentation, and stakeholder coordination across multiple IT initiatives assisting development teams in translating business needs into structured deliverables.
- Performed data analysis using SQL and Excel to support KPI reporting and business decision-making; assisted with UAT planning, defect tracking, and release coordination.

KEY PROJECTS

- BBPS Fintech Platform — Sai Paramount IT Solutions
- Business Problem:** Bill payments across 10+ categories were fragmented across channels, requiring a unified, RBI/BBPS-compliant platform.
 - Solution:** Gathered and documented requirements for a BBPS-integrated bill payment platform covering electricity, mobile, DTH, FASTag, LPG, insurance, and loan repayments.
 - My Role:** Led business analysis end-to-end: requirement elicitation, functional specification, and cross-team compliance coordination.

- **Discovery:** Coordinated with development, QA, and compliance teams to define RBI- and BBPS-compliant transaction flows, data encryption, and secure payment gateway requirements.
- **Business Value:** Enabled processing of 6 lakh+ transactions worth ₹4,000 crore within 5 months of go-live.
- **Scale:** 10+ payment categories nationwide; ₹4,000 crore processed in 5 months.
- **Technology Exposure:** IMPS-based real-time payments, credit-card rent payment feature, cashback/referral rewards engine, secure payment gateway integration, RBI/BBPS-compliant encryption standards.

WasteOps — Industrial Waste Management SaaS — *Tech Exactly*

- **Business Problem:** Industrial and infrastructure sites relied on paper-based bin service processes with no audit trail or legal defensibility.
- **Solution:** Defined requirements for a multi-tenant SaaS platform digitising bin services with GPS validation, QR scanning, and photo-evidenced field operations.
- **My Role:** Defined requirements, specified the immutable record architecture, and mapped the full operational lifecycle into structured user stories.
- **Discovery:** Mapped tenant onboarding, schedule creation, route assignment, CAPA management, incident reporting, and EHS compliance reporting.
- **Business Value:** Replaced paper-based processes with an audit-ready, legally defensible digital record for every bin service.
- **Scale:** Multi-tenant SaaS deployed across large industrial and infrastructure sites; Phase 1 architected to scale internationally.
- **Technology Exposure:** GPS geolocation validation, QR code scanning, photo evidence capture, cryptographic hash chaining for record integrity.

Dailok — AI-Powered Mental Health Support App — *Tech Exactly*

- **Business Problem:** Users needed accessible, always-available mental health support that remained clinically safe and bounded by doctor-approved guidance.
- **Solution:** Elicited and documented requirements for a clinician-controlled AI support app (iOS & Android) delivering 24/7 assistance in Arabic and English within a doctor-approved knowledge base.
- **My Role:** Defined crisis-detection and safety-protocol requirements, and specified the subscription and monetisation model.
- **Discovery:** Worked with clinical stakeholders to define a permanently visible Kill Switch and automated crisis-keyword detection in Arabic and English, triggering instant emergency redirection.
- **Business Value:** Balanced clinical safety with monetisation via a four-tier subscription model spanning AI voice calls, mood tracking, journaling, assessments, and direct doctor VoIP calling.
- **Scale:** iOS & Android, bilingual (Arabic/English), four subscription tiers (Guest, Free, Basic, Premium).
- **Technology Exposure:** RevenueCat billing (Apple & Google), AI scoped strictly to an approved knowledge base as a productivity/safety enabler (not open-ended), WhatsApp AI bot integration, admin panel, VoIP calling.

EDUCATION & CERTIFICATIONS

MBA — Business Analysis · Lovely Professional University (Online)

March 2026 – Present

B.Sc. · North Odisha University, Barbil

2022

Certifications:

Business Analysis (Microsoft) · Data Analytics Professional Certificate (Google) · Power BI Data Analytics 2.0 (CodeBasics) · SQL Beginner to Advanced (CodeBasics) · Agile Requirements (LinkedIn Learning) · Excel Beginner to Advanced (CodeBasics)
